## SUMMARY

---

I hold a degree in Computer Engineering from Iskenderun Technical University and I am continuously striving to improve myself in mobile application development. My goal is to gain comprehensive experience in end-to-end mobile development and contribute to significant projects in a dynamic environment.

Currently, I am actively gaining experience in the app publishing process for the App Store and Google Play Store, working on successfully launching my applications. Throughout this process, I am acquiring valuable knowledge about app optimization, compliance with store policies, and deployment strategies.

With strong problem-solving skills and a commitment to continuous learning, I aim to advance in the ever-evolving world of technology.

## PROJECTS

---

**ChatConnect** is a chat application that allows users to register, log in, create rooms, send messages, and engage in conversations with other users. This application offers real-time communication and utilizes **Firestore Realtime Database**.

**Tarifka** is a recipe application created as part of the **React Native** course on patika.dev. It retrieves recipes from **TheMealDB API** and displays them in an intuitive interface.

**MedTracker** is a **React Native** application designed to minimize medication wastage and enhance home medication tracking. It provides a user-friendly interface that enables users to manage their medications more efficiently and integrates with **Firestore** for data storage. **Firestore Authentication** is utilized for user management.

## EXPERIENCE

---

Ondokuzon Yazılım, Remote

Nov 2023 - Jan 2024

- I developed the **MedTracker** project, enabling users to catalog and monitor their medications. This application offers **real-time database** support and interactive user functionalities. I utilized **React Native**, **LottieView**, **Firestore Database**, and **Firestore Authentication**.

## EDUCATION

---

Iskenderun Technical University, Hatay

June 2024

Bachelor's Degree, Computer Engineering

- Mobile Application Development, Database Administration, Algorithms, Object-Oriented Programming.
